magnitude so that this document includes the main issues and changes updating the guidelines of the American Heart Association (AHA) for cardiopulmonary resuscitation (CPR) and emergency cardiovascular life support (ECLS). This 2015 update has been developed with the aim that those responsible for resuscitation and AHA instructors have a guide for quick reference that provides the basis for these recommendations. The 2015 update, with an editorial team of leading experts from the American College of Emergency Physicians and the American Heart Association, is the first complete clinically oriented reference textbook in emergency cardiovascular care and CPR. The book translates bench research to the clinician's bedside needs and addresses end-of-life issues. The content is appropriate for a large audience, including early caregivers, emergency department and CCU nurses, students, residents, fellows, and hospitalists responsible for cardiovascular emergency situations. A companion website will include the fully searchable text, instructional videos produced by the AHA, and links to ACC, AHA, ACEP, and ILCOR guidelines and policy statements. This book is a comprehensive guide to emergency and trauma care, covering the complete process from pre-hospital care, rapid and point-of-care assessment and triaging to care of the patient during transfer and in hospital care, beginning with a general overview of emergency care and resuscitation. The following sections discuss the treatment of emergencies and trauma in different systems of the body. A complete section is dedicated to paediatric emergencies. The final chapters cover trauma management, toxicology, disaster management, and environmental emergencies such as thermal and chemical burns and snake bites. The descriptive text is further enhanced by more than 700 flowcharts, tables, diagrams, clinical photographs, and short notes to assist learning. Key points, comprehensive guide to emergency and trauma care covers management of emergencies in different systems of the body, includes section on paediatric emergencies, highly illustrated with flowcharts.

tables diagrams photographs and short notes lippincott connect featured title the perfect one of a kind companion to clerkship bootcamps dedicated courses or independent study the pre clerkship guide procedures and skills for clinical rotations delivers clear guidance on fundamental skills and basic clinical procedures essential for success in clinical rotations concise step by step instructions and supplemental illustrations detail need to know information at a glance for quick reference when studying or practicing in a clinical setting accompanied by professional insights and examples that highlight effective application whether paired with bates s pocket guide or used as a standalone resource this compact easy to use text reinforces key information in a cohesive approach to help students feel comfortable and confident in clinical settings cardiac arrest can strike a seemingly healthy individual of any age race ethnicity or gender at any time in any location often without warning cardiac arrest is the third leading cause of death in the united states following cancer and heart disease four out of five cardiac arrests occur in the home and more than 90 percent of individuals with cardiac arrest die before reaching the hospital first and foremost cardiac arrest treatment is a community issue local resources and personnel must provide appropriate high quality care to save the life of a community member time between onset of arrest and provision of care is fundamental and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest specific actions can be implemented now to decrease this time and recent advances in science could lead to new discoveries in the causes of and treatments for cardiac arrest however specific barriers must first be addressed strategies to improve cardiac arrest survival examines the complete system of response to cardiac arrest in the united states and identifies opportunities within existing and new treatments strategies and research that promise to improve the survival and recovery of patients the
